Glazing press VPPH

For the glazing of uPVC window elements with pneumatic-synchronous move and clamping of both clamping bars.

Characteristic features:

- Solid construction
- High accuracy of angles
- Pneumatic-synchronous move and clamping of both clamping bars; pressing bars can be folded to the back
- Ergonomic working due to pneumatic height adjustment with 500 mm lift
- Suited for production lines, as the pressing bars fold automatically to the back

Optional extras:

- Sash stops
- Underframe with locking brake
- Distance between the rollers of the horizontal roller conveyor 100 mm
- Rear profile positioning facilities with brush strips or plastic roller strips Ø 48 mm
