Glazing Bead Saw GLA 400

Glazing bead saw for simultaneous cutting of 2 uPVC glazing beads in one clamping process at 45°.

Characteristic features:

- Cutting of 2 glazing beads at the same time
- Variable pneumatic saw blade feed
- Saw blades are arranged at the top, thus oddments and swarfs fall freely to the floor
- Universal bead clamping on the fixing area applicable for all glazing beads of the same basic geometry
- Pre-adjustment of the glazing bead’s inclination by hand wheel and spindle for an optimal assembly of the glazing beads in proportion to the glass thickness

Optional extras:

- Provision for extraction unit
- Extraction unit
- Collector for rejects
- Clamping system for glazing beads without fixing area
- Manual, digital and/or electronic length stop systems with PC control with PC control

Technical data:

- Power (kW): 2 x 1,1
- Voltage (V): 400
- Air pressure (bar): 7
- Air consumption (/working cycle): approx. 15
- Saw blade Ø (mm): 220
- Milling disk Ø (mm): 130
- Max. profile cross section (mm): 40 x 35 (with or without retaining foot clamping)
- Min. cut length (mm): approx. 200 (without length stop)
  approx. 250 (with ROTOX length stop)
- Machine dimensions W x D x H (mm): approx. 600 x 1200 x 1210
- Weight (kg): approx. 210
- Workable material: uPVC glazing beads
