

## Corner Cleaner

With 2 interpolating axes for a complete finishing of corners

EPA 170

### Characteristic features:

- Variable tooling with up to 10 tool places  
+ contour milling disk
- Fully automatic cleaning of visible surfaces, outer corners, seal grooves and inner corners on uPVC window frames and sashes also with radii, curves and bevels
- High processing quality owing to spring-mounted knifing units compensating profile tolerances in the inner corner area
- Easy program editing for new profile contours by copying and modification
- Automatic profile recognition
- Maintenance-friendly precision guidings
- PLC- and interpolating CNC-control with 2 axes
- PC for the operation and visualisation

### Technical data:

- Power (kW): 2.8
- Voltage (V): 400
- Air pressure (bar): 7
- Workable profile width (mm): 50 - 130
- Workable profile height (mm): 50 - 115
- Machine dimensions L x D x H (mm):  
2.600 x 2.750 x 1.850 with turntable
- Weight (kg): approx. 800
- Workable material: welded uPVC profiles
